HELPING THE GOVERNMENT GET IT RIGHT.

HUBZone Historically Underutilized Business Zone CERTIFIED

Why should you choose Hunter Strategy?

We don't just offer services. We integrate our vast expertise in both digital transformation and cybersecurity into a powerhouse solution. While agencies might procure these as separate entities, we understand that, in practice, these elements are inseparable. Embracing a true DevSecOps philosophy, we fuse these disciplines in every project, delivering unparalleled value. Whether you're migrating to the cloud or overhauling your business processes, we ensure you do it securely and with maximum practical agility.

Need new business applications, custom cyber implements, or incident response services? We'll deliver it, anchored in top-tier software and infrastructure practices. Every day, we arm our Mission Partners with the technology, strategy, and team they need to crush any challenge in the path of mission success.

HUNTER AT A GLANCE:

- HUBZone Certified Small Business
- 8A Joint Venture (ML Hunter)
- GSA MAS (Contract 47QTCA18D005V)
  SINs: 54151S (General IT), 54151HEAL (Health IT), 54151HACS (Cyber), 518210C (Cloud)
- STARS III (Contract 47QTCB22D0006) and various OTA Consortia
- Appraised CMMI Level 3: Services and Development
- Certified ISO27001, ISO9001, ISO20000
- DoD Top Secret Facility Clearance
- DUNS: 079807607
- Cage: 7CM65

DIGITAL TRANSFORMATION

We don't just "write code." We build end-to-end software development factories that leverage proven, DevSecOps, and Agile based approaches to implementing sustainable capability delivery trains. Our expertise with enabling platform automation, using best-in-class DevSecOps tools and software frameworks, is tailored to leverage our customers' existing technology investments. This enables cost-effective transformation from a "coding shop" to a sustainable Software Factory through:

- Continuous Integration and Continuous Delivery (CI/CD) Pipelines
- Automated builds, testing, deployments, & operations
- Design-driven Development
- Full Stack Agile Developers
- Modernized Open Source Frameworks

CYBER RISK MANAGEMENT & ENGINEERING

We proactively position our customers to meet security challenges of tomorrow. Services include:

RED/BLUE TEAM SUPPORT

- Penetration Testing and Red Team Operations
- Security Information and Event Management (SIEM) Setup & Detection Engineering
- Security Orchestration Automation Response (SOAR)
- Cyber Threat Intelligence & Complex Threat Modeling
- 24x7 Security Operations Monitoring

RISK MANAGEMENT SUPPORT

- FedRAMP Consulting and Preparation
- Audit and Assessment
- Security Posture Analysis
- Risk Management Framework (RMF) Authorization

SECURITY ENGINEERING

- Industrial Control Segmentation
- Network Control Engineer

TECHNOLOGY PARTNERS

Google Cloud · servicenow · splunk> · Tyk.io · redhat TECHNOLOGY PARTNER · salesforce · aws PARTNER Advanced Tier Services · CONFLUENT · CROWDSTRIKE Partner · tenable · Security Onion · Microsoft Silver Partner

Prime Contract Case Studies

Healthcare Information Network Exchange Gateway

U.S. Department of Veteran affairs (VA)

GOAL

To improve quality of healthcare information sharing between VA hospital centers via patient specific data leveraging anonymized reporting services

WORK PERFORMED

- Software Development
- Created CI/CD pipeline
- Software Architecture
- Identity Management
- ATO Support

KEY BENEFITS

Integrated with Cerner EHR, automated testing, quality assurance, and deployment to the cloud for HINGE system redundancy. Automated STIG process and addressed vulnerabilities in the original architecture

Red Team Service

Administrative Office of the U.S. Courts

GOAL

To improve cybersecurity posture of the US Federal Judiciary through an adversarial perspective

WORK PERFORMED

- Custom Malware Development
- Social Engineering
- Adversary Emulation
- Purple Team Exercises

KEY BENEFITS

Improved Blue Teams across the entire court system. Recognized by federal judges as improving internal visibility and enhancing security posture against threat actors.

Account Tracking Automation Tool

Defense Information Systems Agency Hosting and Compute Center

GOALS

To automate Task Order Management and Accounting Provisioning for Joint Warfighter Cloud Capability

WORK PERFORMED

- Human-centered Design
- Automated Cloud Native CI/CD at IL5
- Hybrid AWS / Service Now Architecture
- Business System Integrations

KEY BENEFITS

Accelerate DoD Mission Partner access to GovCloud via JWCC from acquisition all the way to account provisioning. Provide business intelligence on cloud spend to DISA HaC and DoD CIO.

Cyber Threat Intelligence and Risk Analysis

National Environmental Satellite, Data, and Information Service

GOALS

To gain informed risk assessment of NOAA NESDIS systems at the nexus of technology and threat intelligence.

WORK PERFORMED

- Risk assessments for international data partnerships using intel reports from IC partners
- Conducted complex threat modeling for NESDIS systems

KEY BENEFITS

Better informed senior leadership on threats and trends as they align to NESDIS Systems and Architecture.
